

Last season the full camp price was \$245 per student, but with the district's donation and promise to fund letter they were able to provide a bulk discount. That discount is \$20 off the registration rate so the cost per student last season was \$225. This season, the price has increased to \$260 due to inflation and the cost of materials/shipping. Camp Invention is still providing the bulk discount if the district donates money again the cost per camper would be \$240.

- If the district is wanting to donate again, we would start off with a promise to fund letter (Camp Invention would provide us a template for this). All of the funding details would be laid out in there and then we could set up your web listing on line so that families can register for free/for a discount depending on the funding for however many students the funding will cover.

Total Campers last year 152:

- 128 campers were covered from the CCSD district funding. (\$29,250 donated)
- 16 campers were covered using Overdeck Foundation scholarship money. This was \$4,500 in scholarship funds that was given to us through our National Fundraising team's efforts as a donation from the Overdeck Foundation. (2023 we have \$3,000 from this foundation)
- 1 Camper was covered from online donations Lena raised
- 4 campers were covered from local donations that Lena raised
- 3 remaining campers either used promo codes, or were parent paid
