## Maryville Glass and Lock Material and Labor Detail

Project:	Clarin	ıda Com	munity Sch	ool District Clou		Date:	8/6/2025		

This proposal includes the cloud instance setup and associated licensing needed to convert the existing on premise RS2 / Access-IT system to the Acre Access Control cloud based platform.

The tech time is included for MG&L commissioning of the new system, installing needed firmware upgrades and converting existing hardware to function in the cloud environment, assistance with importing existing cardholder information and credentials, configuring triggers, contact reporting and lockdowns and other end user operating support.

The work is on a time and materials - not to exceed basis.

This means that MG&L will only charge for the actual time required to complete the necessary steps to commission the system and assist the system administrator to the bring the system online.
