TITLE:

Auditorium Sound Upgrades - Mixer/Tuning/Training - Labor

SCOPE OF WORK:

Replace the existing 16-channel mixing console, tilt existing FOH speakers(2) and tune system. We will install the new 24-channel **digital** mixing console (24.9" W x 19.7" D) purchased on a different quote and connect all existing input cables and label each input. We will connect the output of the board to the existing equalizer(s), power amplifiers and loudspeakers. We assume as part of this quote that the existing equipment to be reused is in working order, if something is found to be not working properly we will make you aware and provide a quote to resolve. We will re-orient the front two speakers (Community CSX) with more downward tilt to better cover the seating area and reduce the slap off of the back wall. Once complete we will tune the system for maximum tonal quality and then cover the existing equalizers to prevent tampering. We will train the operator(s) with one two hour training conducted during school hours.

This quote is good for 30 days.

State and local taxes are not included.

Payment terms are NET 20 days from date of invoice.
