

Mrs. Bergman and Members of the Board:

Once again, we have some excess funding available and would like to utilize it for a project that would have multiple benefits.

Our current project would replace the current lunch tables and chairs with new tables that include attached seating. We are looking at both round and rectangular (wave) tables that we feel will give the commons a more inviting look and welcome our kids back into the cafeteria. We also appreciate the countless years that our hard working custodians have had to pull and reset the commons for general cleaning and events, and how much more efficient it will be to have attached seating that folds and stores.

Bid pricing is attached for your review, and our selected vendor will be Today's Classroom for a total bid cost of \$30,521.40. Your approval would be appreciated.
