

7-12 Building Lock Project

Mr. Ridnour has received two quotes for the 7-12 building lock project.

Walsh Door and Security has a total quote of \$70,921.07 which is broken down into two quotes (\$38,299.91 and \$32,621.16) for different parts of the building.

Maryville Glass and Lock essentially has two quotes as well. The first quote total is \$65,653.10 which includes the replacement doors, storeroom function locks and keying, and laminated tempered sidleites. The locks will remain locked at all times so a key must be used to enter the room. The second quote total is \$71,052.78 which includes replacement doors, classroom security locks and keying, and laminated tempered sidleites. The locks will remain unlocked at all times until a key locks them. To be more secure, Mr. Ridnour is recommending the first quote. The Board also has the option to leave out the laminated tempered sidleites on either quote.

Once they are installed, Mr. Privia will fill out the FEMA paperwork and submit to receive the \$50,000 grant. Also, to help reduce the quote amount, Mr. Ridnour and his staff can possibly do some internal work instead of Maryville Glass and Lock.
