

May Maint. Report

Happenings:

- Ran utilities to the Maint. Building. The water and electrical in the building itself is mostly complete; we are currently starting to store our custodial supplies and other items in it. The metal on the exterior will be complete this week.
- Replaced the shop compressor
- Sprayed the lawns in the district
- Started up the field irrigation system to check and make sure everything survived the winter. No issues were found.
- Set up and had the time capsule viewing event.
- Compile our summer list and plan out accomplishing those items

Looking forward:

- Complete the Maint. Building
- Prepare and coordinate for contractors that are working on projects this summer
- Replace door locks in shop building to match the rest of the campus
- Set up for graduation
